Paul Coulson, Chairman and Chief Executive, said “First quarter results were in line with our expectations, with no material impact from COVID-19. The commitment and dedication of our teams during this challenging period has been outstanding, enabling all our production facilities to continue to serve the beverage and food supply chain. It is too early to assess the macroeconomic impact of the pandemic and, accordingly, we are withdrawing our 2020 financial guidance. However, our defensive end markets, proven operating model and \$1.5 billion in liquidity position us to successfully manage this uncertain environment.”

COVID-19 (“COVID-19”)

The outbreak of COVID-19 and measures to prevent its spread, including restrictions on travel, imposition of quarantines and prolonged closures of workplaces and other businesses, including hospitality, leisure and entertainment outlets, and the related cancellation of events, may impact our business in a number of ways. This is expected to include an adverse effect from reduced global economic activity and resulting demand for our customers’ products and, therefore, the products we manufacture. It may also adversely affect our ability to operate our business, including potential disruptions to our supply chain and workforce. The COVID-19 impact on capital markets could also impact our cost of borrowing.

We expect the ultimate significance of the impact of these disruptions, including the extent of their adverse impact on our financial and operational results, will be determined by the length of time that such disruptions continue which will, in turn, depend on the duration of the COVID-19 pandemic and the impact of governmental regulations that might be imposed in response to the pandemic.

Our response to the outbreak of COVID-19 across our business operations can be summarised as follows:

Business Continuity: We are a leading supplier of consumer packaging solutions, comprising metal beverage cans and glass containers, primarily for the beverage and food end markets in Europe, North America and Brazil. In the markets we operate in, Ardagh is an essential provider of packaging to the beverage and food supply chain. Our people are deemed “Essential Critical Infrastructure Workers” under the guidance of the U.S. Department of Homeland Security, as are our customers. Where other governments have issued guidance, we have received equivalent designations in all other countries where we operate. As a result, all our global operations are permitted to continue to operate and did so continuously through the quarter. We will continue to manage our capacity in response to the evolution of demand.

Employee health and safety: The health and safety of our 16,000 employees and their families and communities, as well as our contractors, suppliers and customers has been our highest priority since the outbreak of the crisis. We established a Group-wide task force to ensure an effective and consistent response across our business. Regular updates have been issued and a dedicated intranet site established to facilitate effective communication of recommendations, policies and procedures. Communication with all stakeholders has been a core element in our response.

Measures continue to evolve in line with best practice and with recommendations by national health authorities and the World Health Organisation. Initiatives introduced to date have included: enhanced hygiene procedures in all locations, including increased cleaning in our production facilities; increased investment in personal protective equipment; adapting work practices and routines to ensure social distancing; establishing procedures for self-isolation; travel advisories including restrictions on all non-essential travel, prior to broader restrictions on any travel; restrictions on visitors to our production facilities or by our employees to external facilities; actively encouraging and ultimately requiring remote working for non-operational personnel, and enhancing our IT capability to facilitate increased remote working.

Strong liquidity: As a precautionary measure in response to increased macroeconomic uncertainty related to COVID-19, we have increased our cash on hand and total available liquidity, by drawing on our Global Asset Based Loan facility and by entering a new \$300 million Credit Facility, as outlined in Note 11 of the Group’s Consolidated Interim Financial Statements. At March 31, 2020, total available liquidity was approximately \$1.1 billion, including \$962 million in cash. Following the issuance of \$700 million 5.250% Senior Secured Notes due 2025, of which \$300 million was used to repay the Credit Facility, total liquidity was increased to a pro forma \$1.5 billion, including \$1.35 billion in cash.
